

Shield Gel Polish

Service Time

00:30

1 Antiseptic

Wash client's hands thoroughly and dry with a towel. Use an antiseptic agent on the client's hands to eliminate any risk of infection.

Remove any nail polish.

2 Form & Shape

Create a nail form and shorten the length of the natural nail using the *White Turtle 180/180 K-File*.

3 Dry Manicure

Use the *K-Straight Pusher* to push back the cuticle and to remove all non-living tissue.

4 Nail Preparation

Buff the natural nail plate using the *Funny Penguin 240/240 K-Sponge* to remove shine.

Remove any dust from the entire nail surface using the dust brush.

Apply *K-Dehydrator* to remove moisture and oils from the natural nail plate.

5 SHIELD Base Coat

Apply one thin coat of *SHIELD base coat* in the same way as you would apply nail polish. Seal the tip of the nail.

Work on four nails at a time and cure under a 36W UV lamp for 90 seconds or under a 45W LED lamp for 30 seconds.

Repeat the process on the other hand.

Once finished with four fingers on both hands, complete application on both thumbs.

6 SHIELD Gel Polish

Apply one thin coat of *SHIELD gel polish* in the same way as you would apply nail polish. Seal the tip of the nail.

Work on four nails at a time and cure under a 36W UV lamp for 90 seconds or under a 45W LED lamp for 30 seconds.

Repeat the process on the other hand. Once finished with four fingers on both hands, complete application on both thumbs.

Apply a second coat of *SHIELD Gel Polish* using the same technique. Cure under the 36W UV lamp for 90 seconds or under a 45W LED lamp for 30 seconds.

7 SHIELD Top Coat

Apply a thin layer of *SHIELD top coat*. Seal the tip of the nail.

Work on four nails at a time and cure under a 36W UV lamp for 90 seconds or under a 45W LED lamp for 30 seconds.

Repeat the process on the other hand. Once finished with four fingers on both hands, complete application on both thumbs

Use *E-DiTac Cleanser* and cotton pads to remove sticky residue from all ten nails.

8 K-Cuticle Oil

Wash client's hands thoroughly and dry with a towel. Finish by moisturizing with a drop of *K-Aromatic Cuticle Oil* at the cuticle, gently massaging using rounded motions.

Removal

1

Wash client's hands thoroughly and dry with a towel. Use an antiseptic agent on the client's hands to eliminate any risk of infection.

2

Put pure acetone on a cotton pad and place on the nail. Wrap the nail with foil and allow the nail to soak off for 10 minutes. Repeat on all 10 nails.

Use the *K-Straight Pusher* to remove any gel polish residue.

Tip

To improve removal time, slightly buff off the top coat using the *Funny Penguin K-Sponge* before soaking.
